

Clean Water Act Section 303(d) List of Impaired Waters 2002 Update Summary Statistics

The list has been approved by both the State Water Resources Control Board and the United States Environmental Protection Agency.

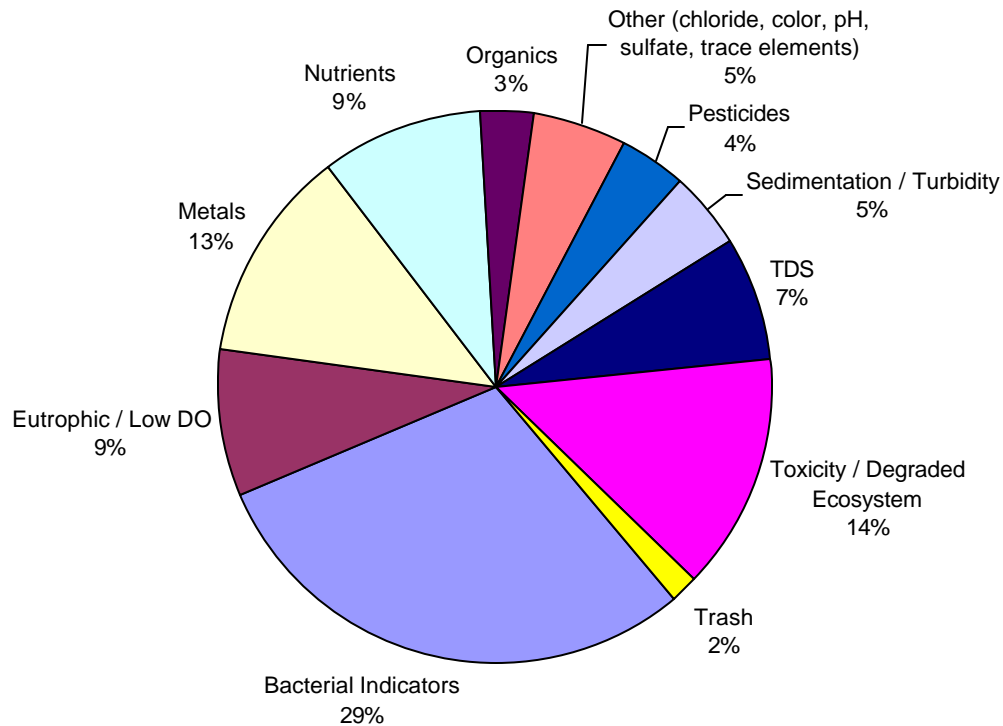

A waterbody listing is defined first by hydrologic boundaries, and then by individual bodies or segments of water within those boundaries. For example, the Pacific Ocean Shoreline is listed several times, with each unique listing defined by hydrologic boundaries. Also, the 901.14 HSA hydrologic boundary is listed twice, with each unique listing containing a different waterbody.

<u>Category</u>	<u>Totals</u>
Listings	52 (66 as listed by the SWRCB – they consider SD Bay to be 15 individual listings.)
Pollutants (unique)	35
Waterbody / Pollutant Combinations	128

Combined List by Category 128 Waterbody / Pollutant Combinations

<u>Category</u>	<u>Total Count</u>	<u>Percent</u>
Bacterial Indicators	38	29.7 %
Eutrophic / Low DO	11	8.6 %
Metals	16	12.5 %
Nutrients	12	9.4 %
Organics	4	3.1 %
Other (chloride, color, pH, sulfate, trace elements)	7	5.5 %
Pesticides	5	3.9 %
Sedimentation / Turbidity	6	4.7 %
TDS	9	7.0 %
Toxicity / Degraded Ecosystem	18	14.1 %
Trash	2	1.6 %
Totals =	128	100.0 %

2002 Section 303d List*
California Regional Water Quality Control Board, San Diego Region

*As approved by the SWRCB and the USEPA

Please note that the 303(d) list is based only on available data. It is not a comprehensive assessment of all waters within the region. Many waterbodies are entirely unassessed and all constituents are not measured in most waterbodies.
